

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Application of

Applicants : David R. Hembree et al.
Serial No. : 09/026,080
Filed : February 19, 1998
Title : A SPRING ELEMENT FOR USE IN AN APPARATUS FOR ATTACHING
TO A SEMICONDUCTOR AND A METHOD OF ATTACHING
Docket : MIO 0020 IA
Examiner : Roy Potter
Art Unit : 2822

Honorable Commissioner for Patents & Trademarks
Washington, DC 20231

Sir:

DECLARATION UNDER 37 CFR 1.131

We, David R. Hambree, Salman Akram and Derek Gochnour declare and state:

1. We are the coinventors of at least claims 1 and 4 of the above-identified patent application, and are familiar with both the Examiner's June 5, 2000 rejection of said claims and the MacDonald, Jr. et al. (U.S. Patent 5,914,864) reference cited therein as support for said rejection.
2. Prior to the December 22, 1997 filing date of MacDonald, Jr. et al., we conceived the idea of using a spring element with an elastic member containing holes therein for use in a semiconductor attaching and testing apparatus as described and claimed in our application. An invention disclosure (Atch. A), discussing, among other things, the formation of holes in the elastic element to provide different spring forces, was prepared and signed by us. In accordance with our employer's practice, we forwarded the disclosure to the Micron Patent Department.
3. In accordance with current practice, as sanctioned under MPEP § 715.07, we have left blank all diligence dates up to a time just prior to the above-cited reference's filing date of December 22, 1997. At least from a time just prior to December 22, 1997 until the February 19, 1998 filing date of our present application less than two months later, we were diligent in our efforts to pursue patent protection. Our diligence, and the diligence of those who acted on our behalf, is evidenced by the following acts.

RECEIVED
SEP - 1 2000
TC 2800 MAIL ROOM

Serial No. 09/045,465
Docket No. MIO 0020 IA
Art Unit - 2822

4. Prior to December 22, 1997, our patent counsel, Mr. Lynch, sent our invention disclosure, along with other disclosures from Micron inventors (Atch. B), to Mr. Hagan of Killworth, Gottman, Hagan & Schaeff (KGHS) to request that Mr. Hagan's firm prepare a patent application on various attributes of the semiconductor attaching and testing apparatus that specifically related to details of an interconnect structure.

5. Again, prior to December 22, 1997, KGHS, after creating a new parent file (Atch. C) relating to the interconnect device, sent us a letter (Atch. D) and draft patent application to review. We reviewed the application and returned the draft application to KGHS, and provided a list of potentially relevant articles and patents.

6. On November 13, 1997, our patent assistant, Trish Homan-Haider, sent a letter (Atch. E) to KGHS asking them to file either a single application covering as many aspects of the invention as possible, or, in the alternative, numerous applications to cover the various aspects.

7. On November 26, 1997, KGHS sent us a letter (Atch. F) and second draft of the original parent patent application for our review.

8. On December 16, 1997, KGHS created a new continuation-in-part (C-I-P) file (Atch. G) based on our invention disclosure and the parent patent application to cover additional aspects our invention which are the subject of the present application.

9. On January 14, 1998, KGHS sent a letter (Atch. H) and finalized version of the parent patent application, in conjunction with papers for our execution.

10. On January 15, 1998, KGHS sent a letter (Atch. I) and draft version of the patent application, in conjunction with the drawings for our review.

11. On January 19, 1998, we sent a letter (Atch. J), the parent patent application, disclosure and executed papers to KGHS for filing in the United States Patent & Trademark Office (USPTO).

12. On January 20, 1998, KGHS filed the parent patent application in the USPTO, with the date shown by the USPTO's filing receipt (Atch. K). That application became U.S. Application Serial No. 09/009169.

Serial No. 09/045,465
Docket No. MIO 0020 IA
Art Unit - 2822

13. On February 16, 1998, KGHS sent us a letter (Atch. L) and final draft of the application incorporating our changes to the earlier draft, as well as formal papers for our execution.

14. On February 19, 1998, KGHS filed our C-I-P application in the USPTO with the date shown by the USPTO's filing receipt (Atch. M).

15. Further, we hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application and any patent issued thereon.

INVENTION DISCLOSURE

ELASTOMER

MIO 020 PA
KGD

1. INVENTOR(S):

DAVE HEMBREE
SALMAN AKRAM
DEREK GOCHNOUR

2. DESCRIPTION

2.1 Title of invention:

METHOD OF MAKING LOW PSI FROM HIGH PSI ELASTOMERS OR OTHER DIFFERENT PSI MATERIALS

2.2 Brief description:

In this method using high Psi Elastomers we use a water drill to form holes into the elastomer material. This way depending on the size of the holes and the frequency the overall PSI of the material can be modified. Other Drilling methods can be employed.

Also, see attached journal dwgs. for other methods.
(extrusion, molding, sprayed layered, woven, o-ring or other)

2.3 Also attach a complete description, including drawings or sketches and articles relevant to the invention. Legible photocopies of laboratory notebooks are acceptable.

3. INFORMATION CONCERNING CONCEPTION OF INVENTION

3.1 CONCEPTION AND DOCUMENTATION OF THE INVENTION

a. Identify the date when you first conceived the invention. (give the earliest date which you are sure.)
(window pane discussion)

b. To whom was the idea first described and on what date? (Other than a co-inventor.)

RECEIVED
SEP - 1 2000
TO 2600 MAIL ROOM

ATTACHMENT A

- c. Identify the date of the first tangible record such as computer simulation, tape out, drawing or written description. Please specify type and location.

3.2 CONCEPTION OF THE INVENTION

- a. Please identify related invention disclosures, patents or other publications describing similar ideas, and other companies working in the same field. Attach copies.
- b. What is the closest technology, of which you are aware?

c. Identify the advantages of this invention over previous technology.
rate) can be varied. previous technology had one spring
rate dependant on material properties. Spring force (spring

3.3 IMPORTANT DATES

- a. Has the invention been disclosed outside the company? No
If yes, to whom, when, and in what form?
- b. Have any articles describing your invention been published?
No If yes, list author(s), title of article, publication and date.
- c. Have any engineering samples been given out? No If yes, whom and on what date?
- d. Has any product using the invention been sold or offered for sale? No

3.4 DISPOSITION OF THE INVENTION

- a. When will (or did) Micron begin use of the invention experimentally? N/A
- b. When will (or did) Micron begin production of this invention? N/A

3.5 MISCELLANEOUS INFORMATION

- a. Was the invention developed during a joint development agreement or other contract with an outside company? No
- b. Please list developmental work outside of the company (including Government proposal or contract).

Dear Tim:

Enclosed are disclosures for U.S. Patent applications which we would like for your firm to prepare for us. Please prepare a patent application for each case; drafting system, product, and process claims in every application where possible.

Each of these cases should be assigned to Micron Technology, Inc., a Delaware corporation.

Should you have any questions, please do not hesitate to contact me. Thank you for your help.

Yours very truly,

Mike
